Dimensions:
27.5" w x 45.5" h x 3.5" d

Effortless security while promoting HIPAA compliance.

The wallstations **NEW! e.sensor** detects when the operator has walked away and automatically turns off the monitor and closes and locks the worksurface tray to provide effortless and unparalleled security for both patient and caregiver.

e550

Additional Information

- o **Effortless Security**
The e550 wallstation detects when its operator walks away, automatically turning off the monitor, closing and locking the worksurface – providing effortless security while promoting HIPAA compliance.
- o **Optional Push Button Height Adjustment**
At the push-of-a-button, the e550 can be raised or lowered, giving caregivers the needed flexibility in comfort and usability.
- o **Optional Locking Keyboard Tray**
Electronically locked in the open position when lowered. Keyboard tray closes automatically when operator walks away from the station, using our proximity sensor technology
- o **Smart Dashboard**
Through "touch" technology, the smart dashboard provides immediate access via keyless, electronic PIN code; sit to stand height adjustment; keyboard lighting; and a manual lock and unlock.
- o **Work Surface w/ Slide Out Keyboard Tray (Optional)**
The large 18.375" X 9.25" work surface and pull out keyboard tray gives you the added ability for med prep, document placement or just setting down your morning coffee.
- o **Infection Control**
Non-porous smooth and cleanable surfaces
- o **Cable Management**
Hassle free cable management. All cables are hidden within the wall station.

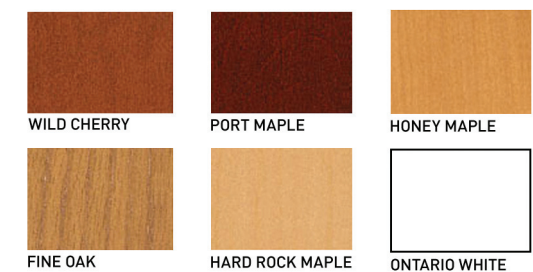

e.sensor NEW!
