Orbit ${ }^{\circledR}$ is an aggressive, omnidirectional presentation laser bar code scanner.
Lightweight and rugged, Obbit is small in size but BIG in performance.

Designed for applications where counter space is at a premium, Orbit is the ideal presentation scanner for retail, convenience, liquor and specialty stores. In addition, Orbit's unique, contoured shape allows it to be picked up and used as a hand-held when scanning large or bulky items.

Engineered with a large, easy-to-find sweet spot, Orbit increases first pass read rate for

maximum productivity. The scanning head can be tilted vertically a full $30^{\circ}$ for added fexibility when scanning various sized objects. Orbit has a patented 20-line omnidirectional scan pattem that produces 1,200 scan lines per second. These features increase the scanning throughput, without increasing Orbit's size.

Orbit is engineered for easy configuration and utilizes user-replaceable cables, in order to meet the multiple application needs across the many markets it seves. Data editing or "parsing" is also a standard feature. Parsing enables the encoded information to be manipulated to meet the host system's requirements.
