

Mirage

Lightweight, Hands-Free Convenience with External Receiver for Exceptional Comfort and Sound Quality

Plantronics headsets have become the world's talking point, with more than six million in use today.

The Mirage® headset is stylish and unobtrusive, with a sculpted shape that fits perfectly behind either ear, eliminating the need for a headband. It is so light, users will hardly know they are wearing it. For added comfort, a receiver that swivels at a touch rests lightly on the side of the ear.

The noise-cancelling model has all the features of the standard Mirage headset, but uses a unidirectional noise-cancelling microphone mounted on a flexible stem in place of the voice tube. This feature is especially useful in busy environments where general background noise interferes with clear communications.

Mirage headsets are ideal for executives, sales offices, and help desks, as well as technical helplines, credit control, call centers, and telemarketing.

Talk to Plantronics

Mirage headsets are just one of a complete range of headsets from Plantronics.

If you would like to know more, contact your distributor/dealer. They'll tell you why the world is talking about Plantronics headsets...and into them.

Mirage®

- **All-Day Comfort.**

The lightweight over-the-ear design is so comfortable, you may even forget you're wearing a headset.

- **Freedom of Movement.**

Mirage headset wearers can easily take notes or work at a computer at the same time they talk on the phone. There's also a slender voice tube that extends and pivots, allowing the optimum position for speech clarity. If it becomes necessary for wearers to leave their desks, they can simply use the Quick Disconnect™ feature without removing the headset, and the other party stays on the line.

- **Sound Quality from the Leaders.**

Plantronics' superior voice tube design with patented SoundGuard®Plus™ and Call Clarity™ technology contributes to the Mirage headset's excellent sound quality.
